**OSP Weekly Report**  
**Week of June 6 – June 10, 2016**

**Tire Crumb**

- On Friday, representatives from ORD, OLEM, and CDC will visit [REDACTED], a tire crumb processing plant in [REDACTED]. This plant, considered to be a state-of-the-art processing facility, provides tire crumb to the major synthetic turf field installers. More information about this facility can be found at: **Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]**

**Early Guidance for NO<sub>2</sub> Primary NAAQS**

- On Friday, the Administrator will chair an early guidance meeting on the primary (health-based) NAAQS for oxides of nitrogen, which was last reviewed in 2010. ORD/NCEA finalized the integrated science assessment in Jan 2016, and OAR/OAQPS is expected to release the first draft of the policy assessment later this summer. OAR's preliminary conclusion is that the current annual and 1-hour standards are adequate to protect public health. OSP has participated in the current review, and no significant science issues have been identified so far.
